

SAMPLE EXPECTED CORRECT RUNS FOR THE DEBUGGING PROBLEM

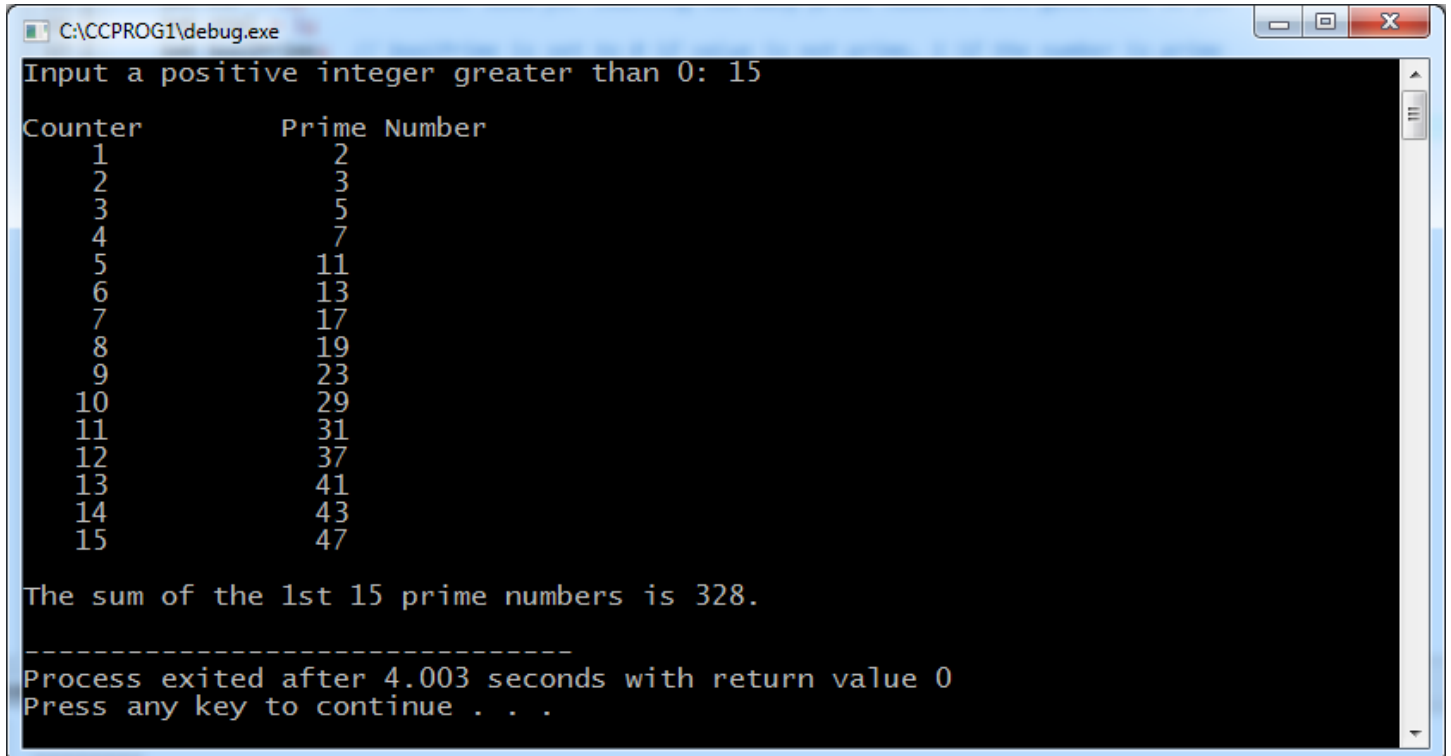

A screenshot of a Windows command prompt window titled "C:\CCPROG1\debug.exe". The window shows the following text:

```
Input a positive integer greater than 0: -5
Invalid input. Try again.
Input a positive integer greater than 0: 5

Counter      Prime Number
1            2
2            3
3            5
4            7
5            11

The sum of the 1st 5 prime numbers is 28.

-----
Process exited after 7.479 seconds with return value 0
Press any key to continue . . .
```

A screenshot of a Windows command prompt window titled "C:\CCPROG1\debug.exe". The window shows the following text:

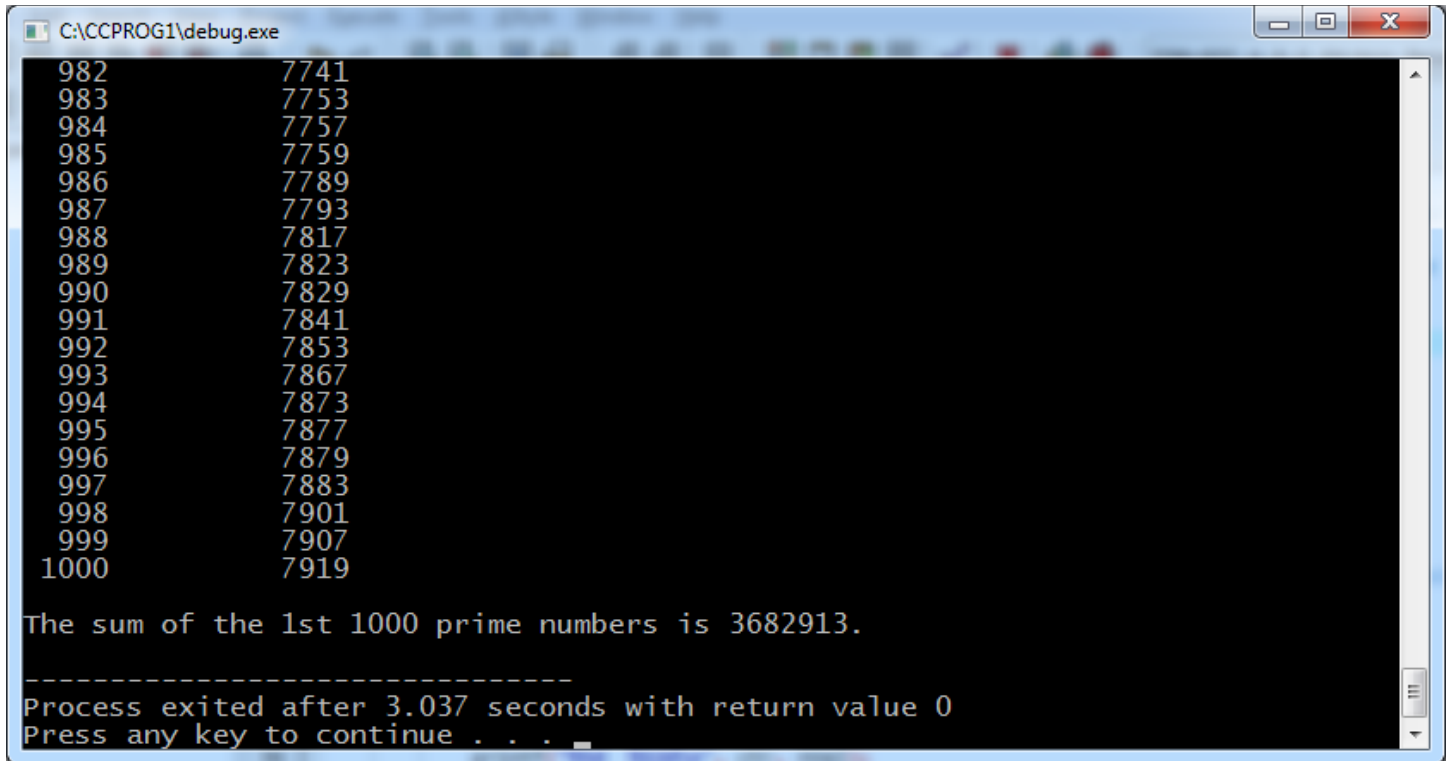

```
Input a positive integer greater than 0: 15

Counter      Prime Number
1            2
2            3
3            5
4            7
5            11
6            13
7            17
8            19
9            23
10           29
11           31
12           37
13           41
14           43
15           47

The sum of the 1st 15 prime numbers is 328.

-----
Process exited after 4.003 seconds with return value 0
Press any key to continue . . .
```

Sample Run for 1000 prime numbers. Note that only the visible output on the display screen is shown in the screenshot.

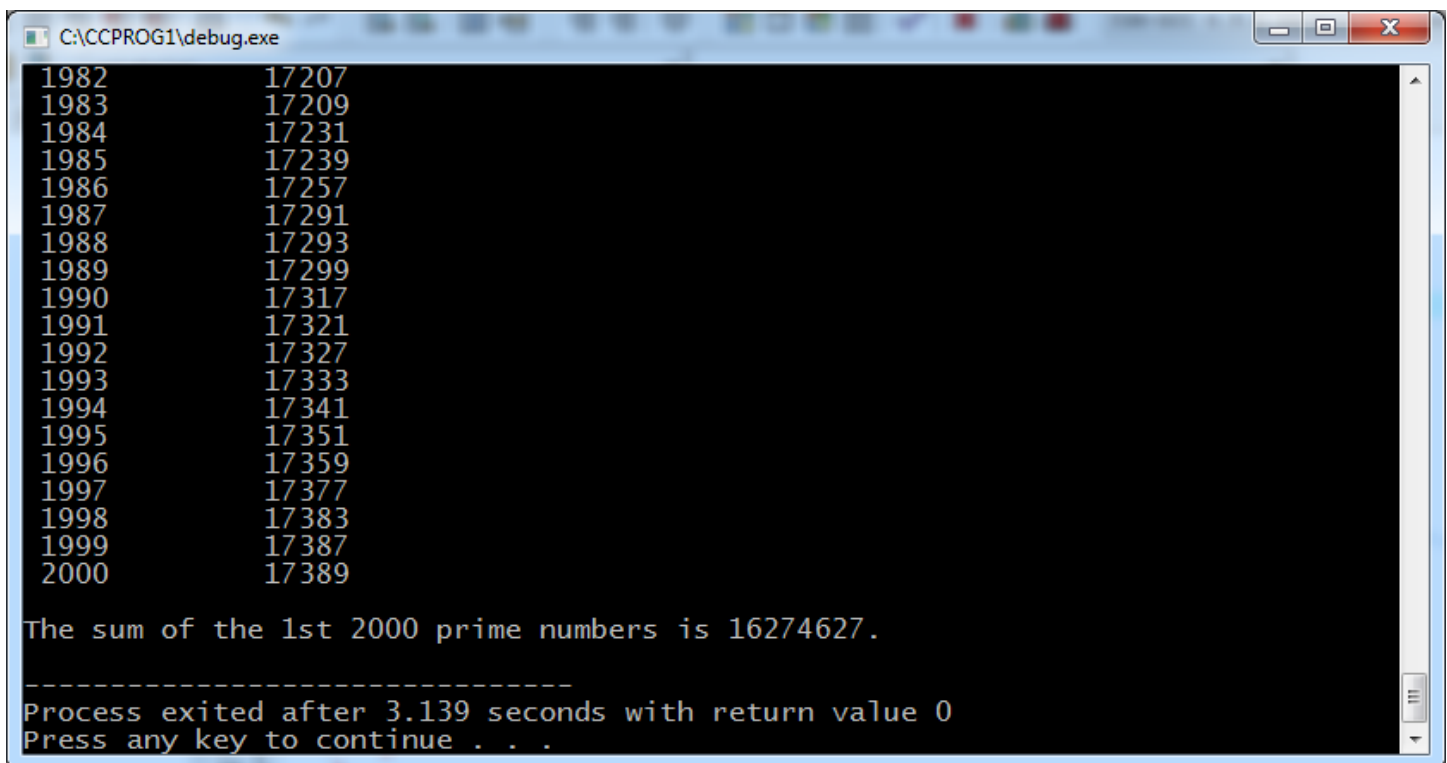

```
C:\CCPROG1\debug.exe
982      7741
983      7753
984      7757
985      7759
986      7789
987      7793
988      7817
989      7823
990      7829
991      7841
992      7853
993      7867
994      7873
995      7877
996      7879
997      7883
998      7901
999      7907
1000     7919

The sum of the 1st 1000 prime numbers is 3682913.

-----
Process exited after 3.037 seconds with return value 0
Press any key to continue . . .
```

Sample Run for 2000 prime numbers. Note that only the visible output on the display screen is shown in the screenshot.

```
C:\CCPROG1\debug.exe
1982     17207
1983     17209
1984     17231
1985     17239
1986     17257
1987     17291
1988     17293
1989     17299
1990     17317
1991     17321
1992     17327
1993     17333
1994     17341
1995     17351
1996     17359
1997     17377
1998     17383
1999     17387
2000     17389

The sum of the 1st 2000 prime numbers is 16274627.

-----
Process exited after 3.139 seconds with return value 0
Press any key to continue . . .
